

[H2020-MSCA-ITN (Marie Skłodowska-Curie Actions Innovative Training Network) European Project "ENHPATHY"]

Profil de poste

Emploi-type Project Manager

BAP

Missions We are looking for a Project Manager to assist the Project Coordinator of the H2020-MSCA-ITN (Marie Skłodowska-Curie Actions Innovative Training Network) European Project "Molecular Basis of Human Enhanceropathies" (ENHPATHY) which started March 1st 2020. ENHPATHY includes Scientific Research in 15 First-Class Academic Organizations and Industrials Companies, as well as several associated partners (www.enhpathy.eu).

The aims of ENHPATHY is to train a new generation of European researchers on which cutting-edge genomics and genome editing approaches combining various in vitro and in vivo disease models will be set up to increase our understanding of the molecular basis of human enhanceropathies.

Activités principales

1. Implement and take responsibility for the operational management of the network
2. Liaise with the EU project officer and Inserm administrative
3. Contribute to the Enhpathy scientific and training programs, by assisting in the supervision and mentoring of the 15 early stage researchers located around Europe
4. Dissemination of project results and outcome

Activités associées

- Organize training events for researchers and Principal Investigators involved in the program
- Liaise and reporting to the EU Project Officer which includes preparation of periodic scientific and financial reports
- Monitoring and reporting of project milestones and deliverables in accordance with EU deadlines
- Manage relationships with academic and industry partners
- Coordinate communication with KOM agency to promote and disseminate results produced in the program (newsletters, articles for general public, EnhPathy's website, and outreach events)
- Support KOM agency to organize scientific/strategic outreach events to promote the program

Connaissances

- The successful candidate will be highly motivated, have an excellent track record in a research field relevant to Life Sciences or previous experience in European-funded project management.

Savoir-faire

- Event management experience
- Excellent organizational and communication skills (written and oral) in English will be essential
- Experience with outreach events

Aptitudes

- The candidate should demonstrate capacity in teamwork

- Proactive, flexible and problem-solving attitude
- Excellent communication and organizational skills
